## CBC Introduces VOYARIS Mobile Resource Management Product Line

**July 9, 2009, Commack, NY** - CBC (AMERICA) Corp. New Business Development Division introduced the **VOYARIS Mobile Resource Management** line of products including: FleetLokator, FleetLogix, SafeGuard Companion, and the Global Asset Tracker.

**Voyaris** offers a full line of **Mobile Resource Management** solutions designed to deliver complete control and insight into your mobile operations. Our easily installed vehicle tracking and management devices provide in-depth fleet information through an industry leading, web based fleet management platform.

With a **Voyaris** solution, you'll immediately see increased efficiencies by minimizing employee overtime, lowering insurance costs, maximizing fuel efficiency and increased customer service and response.

**FleetLokator** is ideal for small to large fleets, and does not require complicated software or hardware installation. The **FleetLokator** allows you to locate, track and manage your fleet and includes Geo-fences, sensors, SOS button, speed alert, ignition on/off, anti-theft alert, manual locate, door unlock, engine disable and daily device diagnostic reports.

**FleetLogix** has all the features of the **FleetLokator** and can also log up to 10,000 locations when cellular service is not available. **FleetLogix** also features **Polygon Geo-Fences**, 16 Input/Outputs, a Bluetooth accessory to integrate with Garmin GPS unit, crash sensor and monitors key maintenance functions within your vehicle's diagnostics system.

**Safeguard Companion** is a tracking device ideal for personnel accountability. Typical application for this device would be for monitoring security guards, VIP personnel or students. **Safeguard Companion** tracks location, reports timed check-ins and emergency voice contact availability. This device can also create geo-fences, using the same speed sensor as in the **FleetLokator**, enabling driving speed monitoring as well. The unit features a magnetic back for attaching to toolboxes and construction equipment at jobsites and has an extended battery or solar powered option available. Adventurers and hunters can also use this product also, with solar charge option.

**Global Asset Tracker** is a highly integrated, self-contained asset-tracking device in a ruggedized, environmentally extreme weatherproof enclosure. The **Global Asset Tracker** can be used for cargo security, cargo health monitoring and Homeland Security. This device enables you to track when a container has been opened and let's you know when your cargo has moved (trailers, rail car, vessel, container or equipment). No external antennas are required. This product can be used with temperature monitoring sensors or volumetric pressure sensors and has up to four (4) year battery life depending on software setup and messages.

In addition, we have the ability to incorporate our mobile cameras and DVRs from our Ganz Automotive products to transmit real-time pictures. By using RFID sensors, we can monitor that a school bus driver has in fact inspected a vehicle or how many times a flat bed tow truck drops its bed to pickup a vehicle or how many times a garbage truck operates its arms as it lifts a container. This combination can also monitor temperature and air pressure in sensitive cargo units.

To find out more about our products and how you can get on the fast track to efficiency, call us at 800-422-6707, or visit [www.voyaris.com](http://www.voyaris.com).

### **About CBC**

For over 25 years, CBC (AMERICA) Corp. has been a leader in the manufacture of CCTV components. CBC's expansive product line and world-class customer support have made them the choice of businesses worldwide. Computar lenses have long been recognized as the leader in surveillance lenses; Ganz brand has assumed a parallel position in the manufacture of cameras, recorders and a wide range of peripherals providing end-to-end surveillance solutions.
